TITLE	Higher Education Enrollment Statistics and Projections. 1995-1997 Biennium [and] Supplement: Enrollment Highlights of Two- and Four-Year Public Higher Education Institutions.
INSTITUTION	Washington State Office of Financial Management, Olympia.
PUB DATE	Apr 95
NOTE	261p.; For previous edition, see ED 353 927.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC11 Plus Postage.
DESCRIPTORS	College Attendance; College Students; Community Colleges; *Enrollment Projections; Enrollment Trends; Full Time Equivalency; Geographic Distribution; *Higher Education; Institutional Characteristics; National Norms; Private Colleges; Public Colleges; State Universities; Student Financial Aid; Vocational Schools
IDENTIFIERS	*Washington

ABSTRACT

This publication, one in a series of biennial reports, consists of tables and figures detailing the status of and projections for higher education enrollments in the state of Washington. The major sources of enrollment data are from the State Board for Community and Technical Colleges Management Information System and from the Higher Education Enrollment Reports covering four-year public institutions and branch campuses. Following a brief introduction in Chapter 1, Chapter 2 covers state enrollment highlights. Chapter 3 presents student characteristics for public community colleges Fall 1993 and for four-year public universities/colleges (Fall 1994). Chapter 4 presents actual and budgeted full-time equivalents of Washington two-and four-year public institutions. Chapter 5 gives baseline Fall enrollment projections, 1995-96 to 2020-21, for two- and four-year public higher education. Chapter 6 offers a perspective on unmet need--a report on the applications match study, 1992-93 follow-up and Fall 1993. Chapter 7 presents county participation rates, Fall 1993/1994. Chapter 8 presents state education attainment and state participation rates and national comparisons. Two appendices offer historical and current enrollment statistics, and enrollment projections--supporting and miscellaneous data. A Supplement presents highlights of data about Washington public higher education enrollment for the community and technical college system and each four-year institution. Enrollment data for two University of Washington branch campuses and three Washington State campuses are shown separately. The Supplement contains 59 additional tables. (KG)

Chapter 1

INTRODUCTION

Higher Education Enrollment Statistics and Projections is published biennially by the Forecasting Division of the Office of Financial Management (OFM). The present publication is the most recent edition to the series of biennial documents that report on the status of higher education enrollments.

Higher education budgets, faculty and staff levels, and workload are directly related to the number of students enrolled. Reliable enrollment statistics and projections are needed to help plan for the future.

This publication examines the Washington higher education system from an aggregate as well as an individual school perspective. The main purposes are to present:

- A statistical overview of the entire Washington higher education system,
- Historical actual and budgeted enrollment data,
- Enrollment projections based on current participation rates, current annual budget FTE, and Senate Bill 5781 passed in the 1993 legislation session,
- A perspective on demand for higher education and unmet need, and
- County enrollment participation and state enrollment participation compared to other states.

OFM will publish individual school enrollment highlights as a supplement to this document. The supplemental issue will include materials received from the respective schools on the following subjects:

- University/College Characteristics,
- Access,
- Service Level and Student Flow,
- Off Campus Programs, and
- Institutional Goals or Objectives.

The main sources of enrollment data included in this document are from:

- State Board for Community and Technical Colleges (SBCTC), Management Information System (MIS), and
- Higher Education Enrollment Reports (HEER) from each four-year public institution and branch campuses.

Additional data were provided by individual institutional admissions, registrar, and research offices of all public and private four-year institutions and vocational-technical institutes, the Higher Education Coordinating Board (HECB), the National Center for Education Statistics (NCES), the U.S. Census Bureau, and the OFM Forecasting Division.

Chapter 2

WASHINGTON HIGHER EDUCATION ENROLLMENT HIGHLIGHTS GENERAL CHARACTERISTICS

Washington Higher Education System

Washington's public higher education system consists of twenty-seven community colleges, five technical colleges, six four-year universities/college, five branch campuses, and one evening degree program.

The six four-year universities/college are located in Seattle, Pullman, Ellensburg, Cheney, Olympia, and Bellingham. Branch campuses, and an evening program have been established in Bothell, Tacoma, Spokane, Richland, Vancouver, and Seattle. The community and technical college system provides access to every major city in the state. Locations are shown in Figure 2-1.

There are twenty-one recognized private higher education institutions. These institutions participate in the Integrated Post Secondary Education Data System (IPEDS) by submitting various IPEDS reports to the Higher Education Coordinating Board (HECB). Six institutions are located in King; two institutions each in Pierce, Spokane, and Walla Walla; and one institution each in Snohomish, Thurston, and Yakima Counties. Locations are shown in Figure 2-2.

Entrance Eligibility to Public Institutions

In general, any individual is eligible to attend any of the twenty-seven public community and five technical colleges upon payment of tuition. Individuals participate at community and technical colleges on a first come, first served basis.

Any individual is eligible to apply to any of the six public four-year universities/colleges and branch campuses/education centers. To attend, individuals must first meet the specific admission standard of the institution to which they have applied, and are then, in most cases, served on a first come, first served basis (see Appendix B-1). Each school maintains its own application deadlines and operates its own admissions procedures. A practice of "pooling" is used to make certain admissions determinations after the preset application deadline. A "rolling" admission practice is also used to screen applications as they are submitted. All four-year universities/college maintain other admission procedures for special cases.

State of Washington

Washington Higher Education Enrollment Trends, 1980-1991
See History of Enrollment by Institution, Appendices A-1 to A-5

Historically, the combined two- and four-year public institution enrollments have constituted more than 85 percent of the total Washington higher education enrollment. In 1993, the public share was 88 percent. The remaining 12 percent represents service by private institutions (Figure 2-3). Within the 88 percent public institution enrollment, the community college system totals 59 percent and the public four-year institutions total 29 percent. The share of private institutions enrollment has increased from 11.43 percent in 1981 to 11.99 percent in 1993 (Table 2-1).

Table 2-1
Higher Education Fall Headcount Enrollment for
Public Two- and Four-Year and Private Four-Year Schools
1980 to 1993

	Public Two-Year		Public Four-Year		Private Four-Year		Total

[1] Includes the Timber Worker Displacement enrollments. 1991 = 125 and 1992 = 399.
[2] Includes Timber Worker Displacement (394), Workforce Training (2,485), and Technical College enrollments (7,362).
[3] Figure in parenthesis is Technical College enrollment, included in 1993 Two-Year System. Technical college enrollments are excluded prior to 1993.

Notes: Public two-year higher education institutions include enrollment from all 27 community colleges throughout the state. Starting 1993, technical college enrollment is included in the total.

Public Four-Year Universities/College:

University of Washington
Eastern Washington University
Joint Center for Graduate Study (1980-1984)/Tri-Cities University Center (1985-1988)
Washington State University
The Evergreen State College
Central Washington University
Western Washington University

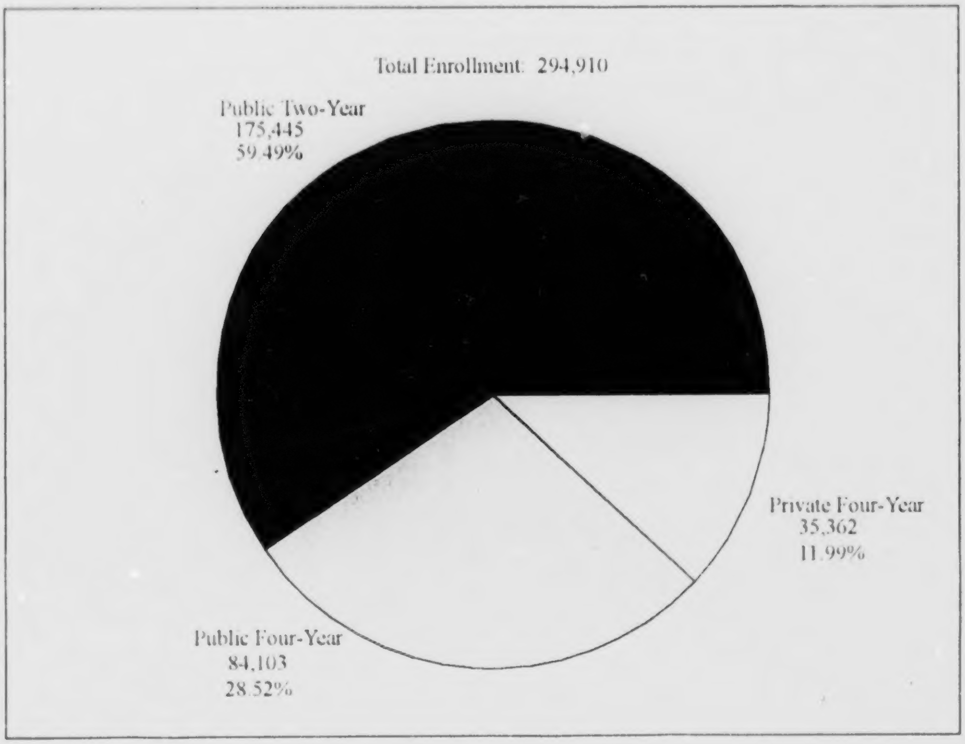
Branch Campuses and Evening Program:

UW - Evening Program
UW - Bothell/Woodinville
UW - Tacoma
WSU - Spokane
WSU - Tri-Cities (since Fall 1989)
WSU - SW Washington (Vancouver)

Private Four-Year Universities/Colleges:

Antioch
Cornish College of Arts
John Bastyr College of Natural Medicine
Northwest College Assembly of God
Puget Sound Christian College
Seattle Pacific University
Walla Walla College
City University
Gonzaga University
Lutheran Bible Institute
Northwest College of Arts
St. Martin's College
Seattle University
Whitman College
Cogswell College North
Heritage College
Northwest Baptist Seminary
Pacific Lutheran University
Seattle Bible College
University of Puget Sound
Whitworth College

Figure 2-3
Fall 1993 Headcount Enrollment
Public and Private Higher Education Schools



The community college system is comprised of 27 colleges and 5 technical colleges and Seattle Vocational Institute (SVI). Table 2-2 presents enrollment shares by college for Fall 1993. The enrollments range from 9,338 for Bellevue to 1,890 students for Big Bend Community College. The SVI is a part of the Seattle community college system. The average enrollment is about 5,470 students (See Appendices A-1 & A-2 for the community college enrollment history by college). Starting in 1991, five technical colleges have been added to the community college system to constitute a new community and technical college system. These colleges are Bates, Bellingham, Clover Park, Lake Washington, and Renton. In the Fall 1993, the enrollments range from 7,386 for Clover Park to 3,611 students for Bellingham Technical College. The average enrollment for the technical colleges is 5,550 students.

Ref.: c:\forecast\2yenrf93.wk3: 12/19/94

Four-year public institution enrollments for Fall 1994 are shown in Table 2-3. Out of 84,981 total students, almost 60 percent enrolled in the main campuses of the University of Washington in Seattle and Washington State University in Pullman. The four regional universities/college serve about 36 percent. The remaining 4 percent are enrolled in branch campuses, one evening program (UW - Evening Degree Program), and Timber Worker Displacement Program funded through the Higher Education Coordinating Board. See Appendix A-3 for the four-year institution enrollment history by university and college.

Table 2-3
Fall 1994 Headcount Enrollment
Public Four-Year Universities/College

College/University	Enrollment	Percent of Total
UW-Seattle	32,768	38.56

Enrollments at public higher education institutions have been capped during 1983-93. Overall, higher education enrollment growth has been closely tied to long term state demographic trends. See Figure 2-6. Table 2-4 and Figures 2-4 and 2-5 show the growth in the two- and four-year universities/college.

Source: Four-Year Institutions - Higher Education Enrollment Report (HEER) State Board of Community
Community and Technical College - Management Information System Report (MIS)

Between 1970 and 1980, enrollment in public four-year universities/college increased by 16 percent, while two-year school enrollment increased by 70 percent. The total enrollment increase was 48 percent (Table 2-4).

During the late 1960s and through much of the 1970s, rapid enrollment growth occurred as the Baby Boom generation reached college age. Substantial increases in female participation in higher education occurred concurrently with the increase of females in the labor force. The expansion of the community college system provided widespread access to higher education and contributed to the rapid enrollment growth in this period.

Between 1980 and 1991, enrollment declined 3 percent in the four-year institutions and 27 percent in the community colleges. A weakening economy in the early 1980s combined with budgetary enrollment caps in 1983 contributed to the decline.

However, from 1983-89 enrollment at the four-year schools remained almost constant at an average of 78,000 students per year and increased by almost 3 percent in 1991 and 1992, even though the college age population of young adults decreased. The growth rates continue to increase in 1993 and 1994 by about 2 percent and 1 percent respectively. At the same time, enrollment at the community colleges has been continuing to grow from 125,520 in 1983 to 138,333 in Fall 1992. Enrollment lids were raised during this period. Consequently, total two- and four-year public institution enrollment increased by 6 percent from 1983 to 1992. In 1993, enrollment is 175,445, an increase of 37,000 students from 1992. This increase is partly due to the beginning of Workforce Training Program (2,485 students) and the inclusion of technical college enrollments (27,362 students) in the community college system.

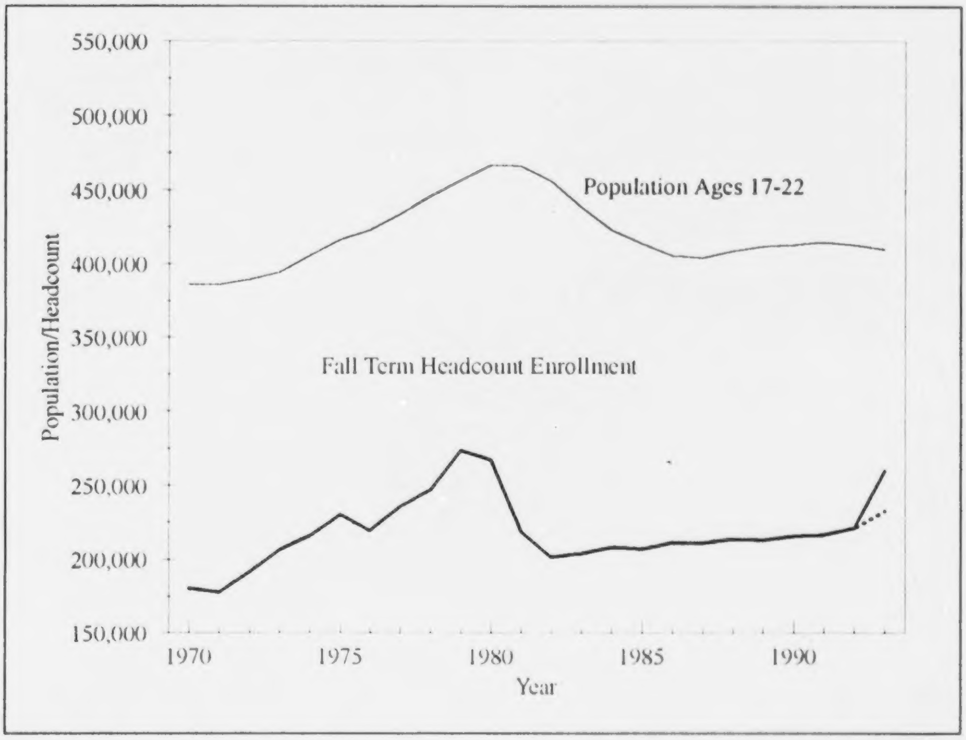
(The dotted line shows enrollment without Technical Colleges)



Degrees Awarded

The number of degrees awarded for the community college system increased by 40 percent in five years from 1988-89 to 1992-93. The increase is partially due to the inclusion of technical college degrees. The degrees for academic programs which are transferable to four-year institutions increased by 48 percent as shown in Table 2-5.

Degrees for four-year public institutions in bachelors, masters, and doctoral level increased by 17, 27, and 5 percent respectively. However, professional degrees decreased by 3 percent. The number of private four-year degrees increased by 8, 120, 34 and 37 percent in bachelors, masters, doctoral, and professional degrees respectively. See Table 2-5.

For all two- and four-year public and private schools, the total number of degrees awarded was 44,492 in 1992-93 compared to 34,841 in 1988-89, a gain of 28 percent. Again, part of this increase is due to inclusion of technical college degrees beginning in 1992-93.

Source: HECB-IPEDS Degree Awarded reports.

The baccalaureate and associate degrees awarded by disciplines during 1984-85, 1990-91 and 1992-93 are shown in Table 2-6. The total baccalaureate degrees for public four-year institutions increased by almost 24 percent during this period. By discipline, Business and Education continue to increase from 1984-85 to 1992-93 by 7 percent each. The largest increases were in Arts & Humanities and Social Sciences. Degrees awarded in Agriculture, Engineering, Mathematics, Physical Sciences, Health Sciences, Architecture, and Life Sciences degrees increased slightly. However, Computer & Information Sciences awards declined.

Private four-year universities as a whole showed a decline in Business (6%) but an increase in Life Sciences (28%). The rest of disciplines indicate similar trends as the public four-year institutions. The total degree growth rate in all private four-year universities between 1984-85 and 1992-93 was 6.41 percent.

For the Community Colleges, the total number of associate degrees increased by 54 percent, from 10,239 in 1984-85 to 15,767 in 1992-93. Associate degrees for Academic Programs increased by 84 percent (See Liberal/General Studies) while Vocational degrees, the remainder of the associated degrees, increased only 19 percent. Note that, technical college degrees are included in the 1992-93 figures.

Degree Production

In 1992-93, the Washington higher education system produced 44,492 degrees with a total fall enrollment of 254,139. See Table 2-7. Forty-seven percent of the degrees were from the four-year public institutions. The four-year private institutions contributed 18 percent. The remaining 35 percent was from the two-year public community college system.

Allowing the community college student an average of three years to earn a degree, the percent of degree completion to total enrollment three years prior was 5.67 in 1983-84. The percentage increased to 9.05 in 1985-86 then gradually declined to 8.49 in 1987-88. The rates improved to 9.14 in 1989-90 and 11.70 in 1992-93. See Line "% Deg of Enr: Three Yr-Lag" of "Two-Year Public School" in Table 2-7.

Allowing the four-year institution student an average of five years to complete a degree, the number of degrees completed as a percent of total enrollment in 1985-86 was 20.22; it increased to 23.99 in 1990-91 and 26.65 in 1992-93 for public institutions. For the private four-year institutions, the percentages started at 22.86 percent in 1985-86 then increased to 25.08 percent in 1990-91 and 27.62 in 1992-93.

Applying an average of four years to completion for the whole system, the average completion rate was 11.32 in 1984-85 and was 16.10 in 1990-91, an increase of 4.78 percentage points. The rates continue to increase to 18.25 percent in 1992-93, and increase of another 2.15 percentage points.

Chapter 3

WASHINGTON HIGHER EDUCATION STUDENT CHARACTERISTICS
FALL 1993 FOR PUBLIC COMMUNITY AND TECHNICAL COLLEGES
FALL 1994 FOR FOUR-YEAR PUBLIC UNIVERSITIES/COLLEGE

Age and Gender Characteristics

Female students comprise about 59 percent of the total student body for community and technical colleges (Table 3-1) and slightly more than 50 percent of the total four-year and total main-campus four-year enrollments (Table 3-2 and 3-3). At the branch campuses 62 percent (Table 3-4) of total enrollment is female.

The average age of two-year community college students is 30 years old while the four-year student is younger, at 24 years old. The average branch campus student is 32 years old.

Credit Hours Enrolled

While the majority of two-year students are enrolled below 10 credit hours (or part time), in Fall 1994 the average four-year student enrolled at slightly more than the official full-time level, or 13.46 credit hours (Table 3-5).

The average four-year branch campus student enrolled at 8.59 credit hours (Table 3-7), compared to 13.65 for the average main campus student (Table 3-6). Eighty-eight percent of four-year main campus students are full time compared with almost 44 percent for branch campus students.

For the total main and branch campus students, 32 percent are in lower division (freshman, sophomore and other), 50 percent are in upper division (junior, senior, and unclassified 5), and the remaining 17 percent are graduate and professional students (Table 3-5).

Resident/Non-Resident Status

The percentages of resident, domestic non-resident, and foreign students of Total Four-Year Institutions are 87 percent, 9 percent, and 4 percent, respectively. The regional universities have higher resident student percentages compared to the research universities (92 percent compared to 83 percent). Sixty-eight percent of graduate and professional students have resident status. See Table 3-8.

Notes:

Research Universities include UW-Seattle, UW-Evening, UW-Bothell, UW-Tacoma, WSU-Pullman (+SCHRA), WSU-Spokane, WSU-Tri-Cities, Vancouver, and HECB-WSU Timber Worker Displacement program.

Regional Universities/College include CWU (+Yakima), EWU (+Spokane), TESC (+Tacoma), WWU, and HECB-WWU Timber Worker Displacement program.

Lower Division includes Freshman, Sophomore, and Other (Non-Matriculated).

Upper Division includes Junior, Senior, and Unclassified 5 (Post-Baccalaureate).

Grad/Prof includes Graduate and Professional.

Resident is a student who domiciled in Washington State according to RCW 28B.15.012.

Domestic Non-Resident is a student who did not domicile in Washington State according to the RCW 28B.15.012 or is not a foreign student.

Foreign Non-Resident is a student who attended an institution on a F-1 visa, or a Canadian with border crossing privilege.

Geographic Characteristics

King, Pierce, Snohomish, and Spokane Counties contribute almost 63 percent of total enrollment at two- and four-year public institutions. Seventy-eight percent of total enrollment is from west of the Cascades. This is consistent with population patterns. More than seventy-five percent of the population age 17 and over resides in Western Washington (Table 3-9). The county participation rate statistics are shown in Chapter 7.

Class Status, Retention, and Student Flow

Of the Fall 1994 enrollment of 84,981 for four-year public institutions, 11 percent are Freshman Entrants, 18 percent are Transfer Students, 67 percent are Continuing Students, and 4 percent are Other Entrants (formerly returning and unknown students). See Figure 3-1 and Table 3-10. The Continuing Student share has been increasing for the past fifteen years from 59 percent to 67 percent, while the share for the New Entering, Transfer Students, and Others has been decreasing from 41 percent to 33 percent as shown in the Table 3-10. The new entering student category alone has declined from 13.19 percent in 1979 to 11.25 percent in 1994.

Table 3-11 shows an increase in the spring to fall retention rate from 71.65 percent in 1986 to 74.69 percent in 1993, a change of +3.04 percentage points in eight years. However, the retention drops in 1994 to 1988 level of 73 percent. These are students who were enrolled in the previous spring and who continued their enrollment to the subsequent fall term. If higher retention rates reflect measures to reduce drop-out rates, they can be viewed positively. On the other hand, higher retention rates may also represent slow progress toward completion of studies, thereby reducing entrance opportunities for first time students.

Student Flow

Table 3-12 indicates that for the past five years (1990-1994):

The rate of Washington high school seniors entering the four-year institutions has slightly decreased from 14.2 to 14 percent. See also Washington high school senior statistics in Appendix B-8.

The number of out-of-state high school entrances has increased from 1,287 in 1990 to 1,389 in 1994, or from 1.60 percent of total four-year enrollment in 1990 to 1.63 percent in 1994. The 1991 rate of 1.78 was at an all time high during 1981-1994. However, the rates start dropping in 1994 and 1995 to 1.64 percent and 1.63 percent respectively.

New transfers from the community college system have remained in between 5,913 to 6,845 students or 14.54 percent of the total community college Academic Program annual average FTEs to 15.45 percent.

New transfers from Washington four-year institutions have remained in between 3,300 to 3,500 during 1990-94. As percentages to the total public four-year previous spring enrollment, the rates are in between 4.35 to 4.92 percent.

Out-of-state transfers have increased from 4,475 to 4,628 from fall 1990 to 1994. However, as percentage of the total public four-year fall enrollment, the rates drop from 5.56 percent to 5.45 percent during the years.

Continuing students have increased from 53,646 to 56,878 students. But as percentage of the previous spring enrollment, the rates decrease by one percent, from 74.35 percent to 73.36 percent during 1990-1994.

Former Returning Students and Students from Unknown Sources have decreased slightly from 3,610 to 3,604.

For overall enrollment, the fall headcount has increased from 80,517 to 84,981, which is an increase of 5.54 percent from 1990 to 1994.

---

[1] Does not include the Tri-Cities University Center enrollment, during Fall 1979 to Fall 1988.

[2] Projected number.

[3] Budget Target (Includes Timber Worker Displacement program).

Chapter 4

ACTUAL AND BUDGETED FULL-TIME EQUIVALENTS OF WASHINGTON TWO- AND FOUR-YEAR PUBLIC INSTITUTIONS

The Office of Financial Management (OFM) monitors actual budget activity of the community colleges and four-year institutions relative to budgeted full-time equivalents (FTEs).

This chapter reviews recent trends in both budgeted and actual FTEs. Sources are from OFM Budget Driver Reports.

For the public institution system, the variance between the actual and budgeted annual average FTEs ranged from 870 FTEs to 4,888 FTEs during Fiscal Years 1988-1994; with the percent differences ranging from +0.6 percent to +2.7 percent (Table 4-1). Variances are generally higher in 1994 for most institutions. This is probably because of a legislative policy change which modified the restrictions on over-budgeted FTEs.

The two-year public institution system was more than 1,000 FTEs over budgeted FTEs for each of the four Fiscal Years, 1987 to 1990. The actual variance was 515 in 1991 and increased to 3,365 in 1994. The average percentage variance during 1987-90 was +1.4. The variance dropped to +0.6 percent in 1991 and increased to +3.1 percent in 1994 (Table 4-2). Note that Workforce Training Program began in 1994 and it is the first time that the technical colleges are included in the two-year system.

For the four-year public institutions as a whole, the variances averaged about +1.14 percent during the last five years (1990-94) or about 849 FTEs. In 1994 the variance was 1,523 FTEs or 2.0% over the budget (Table 4-3).

Institutional actual and budgeted FTEs are shown in Tables 4-4 through 4-16.

Chapter 5

BASELINE FALL ENROLLMENT PROJECTIONS, 1995-97 TO 2020-2021 TWO-YEAR AND FOUR-YEAR PUBLIC HIGHER EDUCATION

Including Technical Colleges

In accordance with RCW 43.62.050, the Office of Financial Management (OFM) issues biennial projections of higher education enrollment based on "current" rates of participation.

The enrollment projections reflect the number of students that would enroll in public two- and four-year higher education institutions in the future if "current" participation rates by age and sex were maintained. The projections are based upon the actual Fall 1993 participation rate for the two-year colleges and the Fall 1994 participation rate for four-year institutions. The rates are computed by using single year of age and sex of the population age 17 years old and over.

The enrollment projections are prepared in three steps. The first step is to calculate the participation rates, which are the number of students enrolled in Fall 1993 and 1994 per 100 population of the corresponding year. The rate is computed for each single year of age and sex.

The second step is to apply the calculated participation rates to the most recent OFM population forecast (prepared in November 1994) for 1995-2020. This results in Fall headcount enrollment projections by single year of age and sex categories. The primary assumption of the projections is that the participation rate for 1995-2010 is held constant at the 1993 rate for the two- and 1994 for four-year institutions.

In the third step, the projected headcount enrollments are converted to annual average full time equivalent (FTE) enrollments by applying the most recent five year average fall term headcount enrollment and annual average FTE ratios (See Appendix B-7).

The projections represent the level of enrollments that would be attained in the future if current participation rates of 1993 and 1994 were maintained. Therefore, the projections do not reflect persons who may currently be unserved by the Washington higher education system. Chapter 6 supplements the "current participation rate" projection for the four-year institutions with an analysis of unmet demand -- students who apply to Washington four-year institutions, but who are subsequently unserved by any component of the Washington higher education system.

Baseline Enrollment Projections

The enrollment projections are then presented in three different ranges of time. The intermediate range covers the 1995-97 Biennium. The short to medium range covers the next seven biennia - 1997-99 to 2009-2011. The long range covers the period of the next 30 years - 1995-97 to 2020-21. An alternate baseline projection using budgeted enrollments and a projection based on Senate 5781 are also briefly presented.

Population Change, 1970-2020

See Figures 5-1, 5-2 and Appendix B-2

Higher education enrollment growth has been closely tied to the long term demographic trends of the state especially the prime college age population ages 17-22 years.

Strong growth in the prime college age population groups beginning in the 1995-97 Biennium will place substantial additional enrollment pressures on the two- and four-year institutions.

After growing very rapidly during the 1970s, the 17-22 age population declined through most of the 1980s. The number of persons age 17-22 is forecast to rise sharply, from 404,805 in 1994 to 419,775 in 1996, and continue to grow rapidly after 1996, reaching 562,300 by the year 2010 and remaining between 562,000 to 565,000 during 2011-2020.

The age 23-29 population, which also declined during the 1980s, is forecast to decrease by about 8,000 during the 1995-97 Biennium. This 23-29 year old group will resume strong growth in year 2001 to 2019.

The age 30-44 and age 45 and over population groups, which participate in higher education at much lower rates than 17-22 year olds, will continue to grow during the 1995-97 Biennium. However, due to their low participation rates, these groups will place relatively little pressure on higher education enrollments.

Participation Rates, 1977-1993 for Two-Year and 1970-1994 for Four-Year

Participation rates for the youngest, prime college age groups have increased steadily since enrollment lids were established in 1981, while participation rates for the older groups declined until the most recent years. The rates for the 23-29 group began to rise in the 1990s.

Participation Rates of Two-Year Institutions (Technical Colleges Included for 1993)

See Figure 5-3 and Appendix B-5

The participation rate for 17-22 year olds in the two-year institutions has increased steadily since 1986; the 1993 rate is all time high during 1977-1993. The participation rate of 23-29 year olds in the two-year institutions fell after enrollment lids were established in the early 1980s; the rate for 23-29 year olds continued to decline slightly through the 1980s, before rising in 1991. The participation rate of persons 30 years of age and older has declined slightly since 1980, but is only slightly lower than in 1980. The rate begins to rise in 1993. The significant increase of all two-year 1993 participation rates are partly due to the inclusion of technical colleges and new Workforce Training Program enrollments.

Participation Rates of Four-Year Institutions

See Figure 5-4 and Appendix B-6

The participation rate of 17-22 year olds in four-year institutions increased throughout the 1980s; the rates continue to grow to the present year. The participation rate of 23-29 year olds increased between 1989 and 1994, and is slightly lower in 1994 than in 1980. The participation rate of persons 30 years of age and older has declined since 1987; the rate is only slightly lower than 1980.

1995-96 to 1996-97 Enrollment Projections

See Table 5-1 and Figure 5-5

For the two-year public institutions, the actual Fall 1993 headcount enrollment of 175,445 shows a substantial increase of 37,112 over the Fall 1992 level of 138,333 students. The increase was due mainly, as mentioned earlier, to new enrollments in Workforce Training Program (394) and the inclusion of technical colleges (27,362).

For the two-year colleges, the budgeted biennial FTEs for 1993-95 is 218,056. The projected 1995-97 FTE, based on a continuation of Fall 1993 participation rates, is 223,341, an increase of 5,285 FTEs over the 1993-95 level. See appendix B-13.

For the four-year public institutions, the actual Fall 1994 headcount enrollment of 84,981 represents an increase of 878 over the Fall 1993 headcount enrollment of 84,103 students. The increase from Fall 1994 to Fall 1993 was due mainly to higher levels of undergraduate transfers. See Appendix B-13.

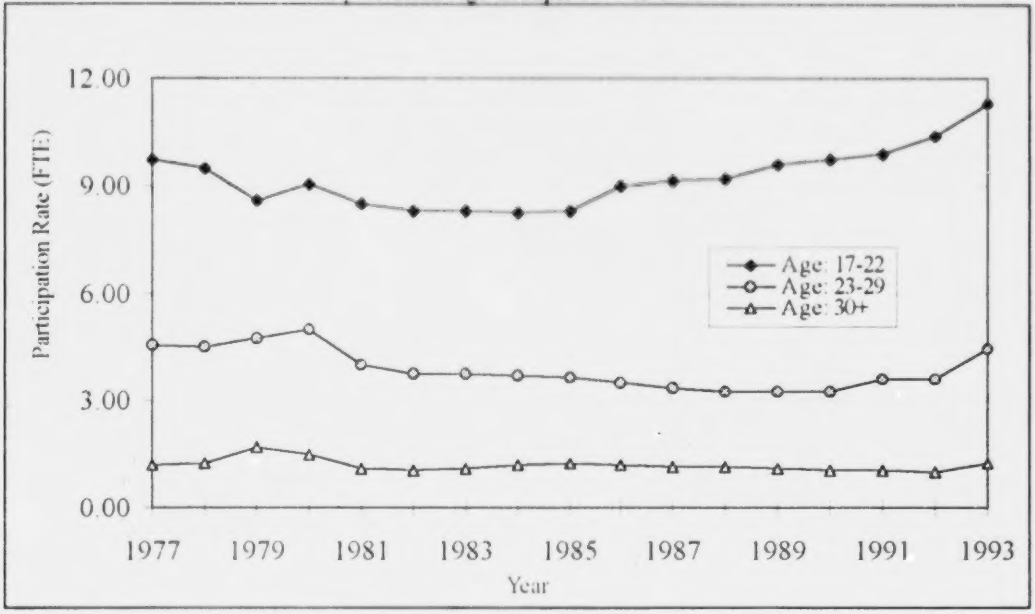
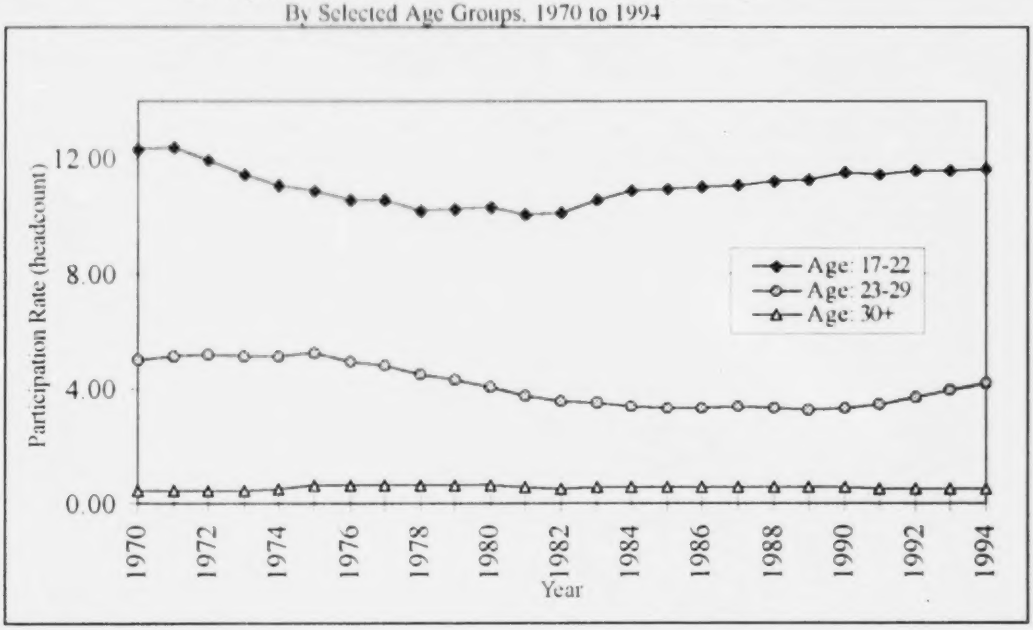
Figure 5-3
Participation Rates for Public Two-Year System
By Selected Age Groups, 1977 to 1993



c: forecast 2&4prhis.xls 11/28/94

Figure 5-4
Participation Rates for Public Four-Year University/College
By Selected Age Groups, 1970 to 1994



c: forecast/2&4prhis.xls 11/28/94

For the four-year institutions, total budgeted FTEs for the 1993-95 Biennium is 150,660 FTEs. Projected higher education enrollment for 1995-97 biennium based on the maintenance of current rates of participation is 170,820 students, or 154,660 FTEs. This results in a biennium increase of 4,000 FTEs from the 1993-95 budget level.

1997-98 to 2010-11 FTE Enrollment Projections

See Table 5-1 and Figure 5-5 .

The public higher education FTE projections for the next seven biennia show an average increase of about 6,000 for each biennium for the two-year institutions. The projection for the four-year institutions indicate an increases of 5,700 for each biennium during 1997-98 to 2010.

1995-96 to 2020-21 Long Run FTE Enrollment Projections

See Table 5-1, 5-2, and Figure 5-5

FTE projections over the next three decades show a steady increase through about 2012 for both two-year and four-year institutions. These increases in enrollment are largely due to the entrance into higher education of the children of the Baby Boom generation. After 2012, the growth rates are slower for two-year institutions. For four-year institutions, the high growth of FTE enrollment stops at 2012-13 and turns to very slow increases after that.

Table 5-1
Public Two- and Four-Year Enrollment Projections, 1995-96 to 2020-21
Based on Actual 1993 or 1994 Enrollments and OFM 1994 Population Forecast
Including Technical Colleges

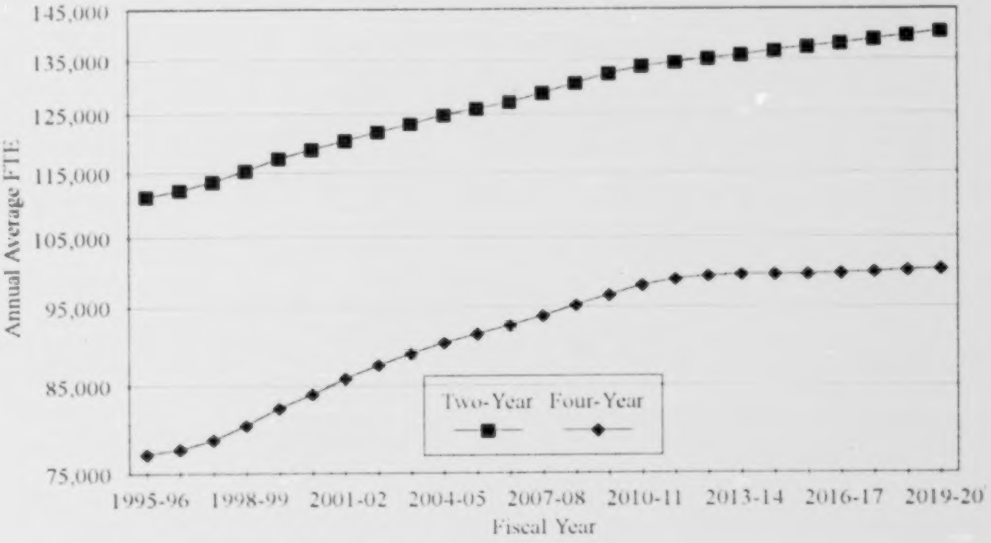
Figure 5-5
Annual Average FTE Projection for Public Two- and Four-Year Universities/College
1995-96 to 2020-21



Alternate and Senate Bill 5781 Enrollment Projections

See Table 5-2, 5-3, and 5-4

In addition, a projection based on budgeted participation rates is also included. Table 5-2 represents projections based on the current participation rate as determined by budgeted enrollments in 1993 and 1994 for public two-year and four-year higher education respectively. The enrollment projections are slightly lower than the projection derived from the actual fall enrollment participation rates.

Pursuant to Senate Bill 5781 (RCW 28B15.515 and RCW 28B.10.776-786) passed in the 1993 legislative session, enrollment projections needed to reach the long term Higher Education Coordinating Board (HECB) design for the 21st century goal and the minimum fiscal year 1993 participation rate goal are included in Table 5-3 and 5-4 respectively.

Table 5-3 contains projections based on the HECB's Design for the 21st Century Long Term Goals. For the upper division four-year schools, these goals reflect the 1985 national participation rate for the state ranked at the 70th percentile. For the lower division and for the two-year institutions these goals reflect the actual 1985 participation rate.

Table 5-4 shows projections based on the participation rate funded in the fiscal year 1993. The bill requires OFM to determine minimum enrollment goals based on the fiscal year 1993 participation rate.

Chapter 6

A PERSPECTIVE ON UNMET NEED: APPLICATIONS MATCH STUDY
1992-93 Follow-Up and Fall 1993

Background

The demand for higher education may be separated into two components: (1) the actual enrollment, and (2) unmet demand. The **enrollment** projection in Chapter 5 is based upon population forecasts by age and sex under the assumption that participation rates will remain at the current levels. If enrollments were not capped, this projection alone would represent expected demand for higher education. However, participation rates have been limited by enrollment lids since the early 1980s. Potential **unmet demand** is assessed through the applications match process, which matches applicants to Washington public four-year institutions with registered students in Washington public and independent higher education institutions.

The goal of the Applications Match study is to obtain an unduplicated count of qualified individuals applying to Washington public four-year higher education institutions who were not served by the higher education system of the state. The Applications Match Study is designed to provide a more accurate account of unserved applicants than can be obtained by adding the numbers of qualified applicants who are denied admission by the individual institutions. The single institutional perspective does not adjust for multiple applications by individual students; nor does it account for students denied admission by one institution, but admitted and served by another, nor does it distinguish between Washington residents and out-of-state applicants.

Applications to higher education institutions are only one measure of demand for higher education, although they are still the most concrete and objective indicator available. Other forms of demand are not fully captured by applications data, such as individuals who fail to submit applications to four-year institutions because they lack the financial resources or other support services needed to attend. Examination of applicant and enrollment data provides a measure of unmet need among Washington residents who have taken the step of applying to a four-year institution. Persons who do not submit an application because they lack the resources to participate in higher education, or who believe they will not be admitted due to enrollment lids, are not counted by this measure of unmet need.

An applications match study has been conducted annually since Fall 1987. The data requested from institutions as well as the assumptions made in the matching process varied slightly over the first three years of the study. Data for 1990-93 are not entirely comparable with those of preceding years.

A new perspective was added to the Applications Match study beginning with the 1990-91 data, when data were collected for fall, winter and spring terms. This update continues the follow-up portion of the study, started in 1990-91, providing an estimate of unserved applicants for the entire 1992-1993 academic year, including persons applying for Winter 1993 and Spring 1993 terms, and matches against enrollment data for Winter 1993, Spring 1993, and the entire 1993-1994 academic year.

Data Elements

As in the past, application and registration data were requested and received from all public four-year institutions. Registration data from independent universities[1] and from community colleges[2] were also used in the study. A database emphasizing the individual applicants was created. For each applicant to public four-year institutions, information related to all applications and to enrollment status was developed. Social security number (SSN), name and birthdate were the basis of the matching procedure. Extreme care was taken to avoid any inappropriate matches.

---

[1] Independent universities providing enrollment data for 1992-93 were Seattle University and the University of Puget Sound. For 1993-94, City University, Gonzaga University, Heritage College, Pacific Lutheran University, St. Martin's College, Seattle Pacific University, Seattle University, University of Puget Sound, Walla Walla College, Whitman College, and Whitworth College are included in the analysis.

[2] Data for the state's five technical colleges, the former vocational-technical institutes (VTI), included in earlier studies, were not been available for this study from 1989 through Spring 1993. They were available for 1993-94.

An applicant's ***county of permanent residence*** is the county of permanent residence captured at the time of application and stored in the enrollment file, if the applicant was enrolled in a four-year institution. If the applicant did not subsequently enroll, a county code based upon ZIP code of permanent residence at the time of application was used.

Applicants were classified as "***accepted***" if they were admitted to at least one public four-year institution. They were classified as "***denied***" if they were denied admission to at least one public four-year institution and were not admitted by any other. If an applicant was neither admitted nor denied, but instead withdrew an application, submitted an incomplete application, or if the admission status was not provided by the institution, the applicant's admission status was classified as "***other.***"

Status of Applicants for Fall 1993

There were a 68,830 applicants, who submitted 80,488 applications to public four-year higher education institutions in Washington State in Fall 1993. The subsequent status of these applicants is outlined in Table 6-1.

- Of the 37,661 Washington resident applicants for Fall 1993, 24,361 were enrolled at one of the public or independent four-year higher education institutions in Washington during Fall 1993. An additional 3,894 were enrolled in a community college during Fall 1993.

- A total of 9,406 Washington resident applicants for Fall 1993 were not enrolled in any of the higher education institutions involved in this study during Fall 1993.

- Of the 9,406 Washington resident applicants for Fall 1993 not enrolled during Fall 1993, 5,350 were offered admission to a public four-year institution for Fall 1993. These applicants are considered to be served by the higher education system.

- Application information provided for 1,229 of the non-enrolled Washington resident applicants for Fall 1993 indicated admission status unknown, a withdrawn application, an incomplete application, or that no admissions decision had been made as of the tenth class day of the fall term. These applications have been excluded from the analysis.

- Finally, 2,827 of the non-enrolled Washington resident applicants for Fall 1993 were denied admission by at least one public four-year institution and not admitted by any other for Fall 1993. Of these, 1,828 were known to have a grade point average (GPA) or admissions index (AI) acceptable for admission to a Washington four-year institution and 429 had GPAs or AIs lower than the minimum acceptable level. The GPA and AI for 570 of these applicants are unknown. Some of these 570 applicants may have had acceptable GPAs or AI's.

Results of the analysis indicate that for Fall 1993 between 1,828 and 2,398 qualified persons were denied admission to a public four-year institution and not enrolled in any other public or private Washington higher education institution during that same term. Of the 2,398 potentially unserved Fall 1993 applicants, 389 were either enrolled or admitted for Winter or Spring 1994 terms. When 1994-95 data become available, it is likely that the figure of 2,009 potentially unserved Fall 1993 applicants will be reduced.

Table 6-1

Accepted for admission in subsequent term	n.a.	n.a.	45	49	61	n.a.
Qualified, potentially unserved resident applicants (includes matches against subsequent terms)			1,208	1,666	1,778	n.a.

Interpretation of Results for Fall 1993

Not all of the potentially unserved applicants (the "Waiting Line") are necessarily unserved.

- Some applicants may be attending institutions outside Washington or one of the independent institutions within the state for which no enrollment data are available.
- As shown for Fall 1990, Fall 1991 and Fall 1992, many applicants denied admission for a fall term are admitted in subsequent terms. Availability of application and enrollment data for each academic term starting with Fall 1990 allows an analysis of the application and enrollment patterns of these individuals in subsequent terms. *The complete analysis for 1992-93 is presented in the section that follows.*
- Since approximately 40 percent of all individuals admitted to a four-year institution never enroll, it is likely that some of these applicants would not enroll even if accepted.

The "waiting line" as indicated by unserved applicants should not be interpreted as a measure of total unmet need for higher education. Persons who may lack the resources to attend a four-year institution, for example, and who may not submit an application, are not counted among the unserved.

Status of 1992-1993 Academic Year Applicants

Applications match data were collected for fall, winter, and spring terms beginning with the Fall 1990 data. The traditional waiting line calculations show 2,748 potentially unserved applicants for Fall 1992, 860 potentially unserved applicants for Winter 1993 and 358 potentially unserved applicants for Spring 1993. But the traditional waiting line calculation for a single term is a snapshot in time. **It is inappropriate to sum these figures for a total 1992-93 waiting line since many individuals appear in more that one term and since many individuals appearing in the waiting line in one term are subsequently admitted by a four-year institution.**

To gain a more accurate picture of the magnitude of the cumulative annual waiting line a longitudinal analysis of potentially unserved applicants was performed. For the 1992-93 academic year, 110 applicants appeared in the waiting line for more than one term, 3 of them for all three terms of 1992-93. Tables 6-2 and 6-3 assign unserved Washington resident applicants to four-year public institutions for the 1992-93 academic year to the first term within the academic year for which they were denied admission.

Table 6-2 breaks out the total number of unduplicated applicants for the entire 1992-93 academic year who were unserved during the term for which they applied (3,845). The entire group of 3,845 applicants is termed the ***academic year waiting line prior to follow-up***. Of this group, 1,574 applicants were served during subsequent terms of the 1992-93 academic year or during the 1993-94 academic year. The resulting number of applicants who were not served during either the 1992-93 or the 1993-94 academic year is 2,271. This group of 2,271 is the ***academic year waiting line after follow-up***.

Table 6-3 shows the nature of the subsequent application activity for the 3,845 individuals making up the 1992-93 academic year waiting line prior to follow-up who were unserved during the term for which they first applied, characterized by application type.

Table 6-2
Summary: 1992-93 Academic Year Waiting Line Prior to Follow-Up

Subsequently enrolled or accepted for admission, public or independent four-year or two-year institution	1,574
Remaining unserved applicants for 1992-93	2,271
Total	3,845

To summarize Tables 6-2 and 6-3:

- Of the total 3,845 individual applicants unserved in the term for which they applied, 1,574 were subsequently enrolled or accepted for admission.

- 2,271 individuals, those represented by the shaded areas in Tables 6-2 and 6-3, were unserved both in the term for which they initially applied and through the following academic year.

- Most of the 2,271 unserved, 93 percent, did not apply during the remainder of 1992-93 or during 1993-94.

- Of the 2,271 unserved individuals, over half were applicants to graduate school or other post baccalaureate programs.

- Of the 1,053 unserved applicants at the undergraduate level, approximately 80 percent are transfers and/or returning students. Students entering from high school accounted for 214 of the unserved applicants.

Table 6-3
Detail: 1992-93 Academic Year Waiting Line Prior to Follow-Up
(Academic Year Waiting Line After Follow-Up is shaded.)

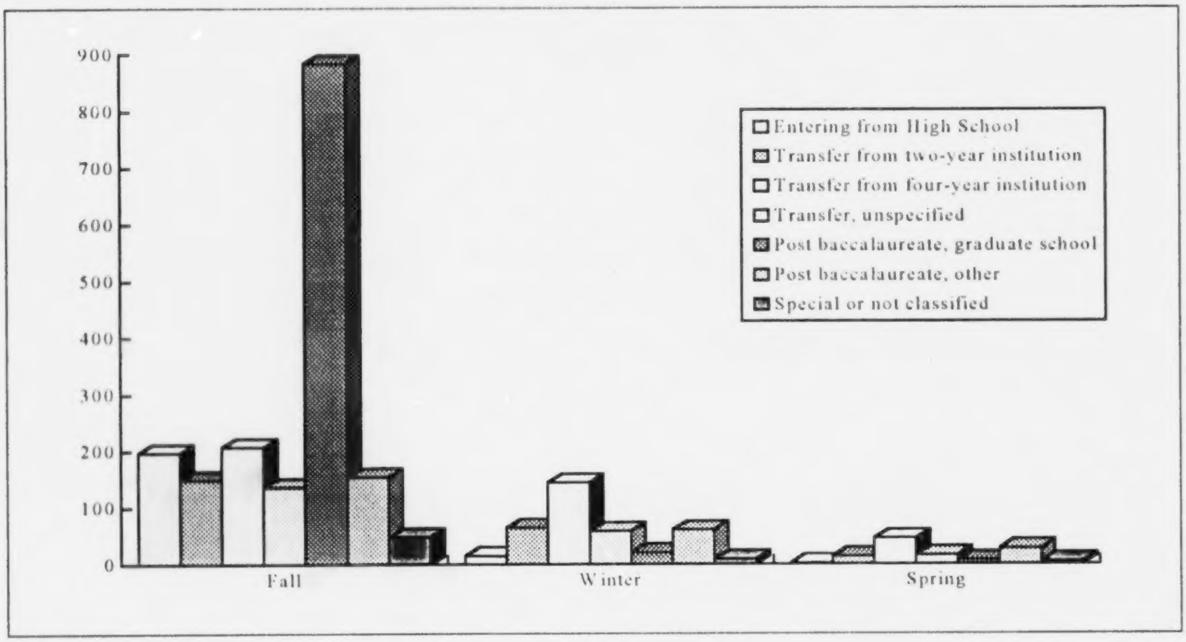
		Transfer			Post Baccalaureate			
	High School	Two-Year	Four-Year	Un-specified	Graduate School	Other	Special/ Unknown	Total
Subsequently enrolled, public four-year	54	171	150	123	137	92	13	740
Subsequently enrolled, independent four-year	53	37	48	23	50	37	7	255
Subsequently enrolled, community college	95	99	101	58	59	52	14	478
Subsequently applied and accepted for admission	9	11	20	16	30	13	2	101
Subsequently applied and denied admission	**8**	**9**	**23**	**20**	**84**	**17**	**0**	**161**
Did not subsequently apply	**206**	**220**	**375**	**192**	**827**	**227**	**63**	**2,110**
Total	425	547	717	432	1,187	438	99	3,845

Figure 6-1 is a graphical depiction of the information contained in the shaded portion of Table 6-3, but broken out by term (fall, winter, spring). Here, transfer applicants include any who have previously attended an institution of higher education, not necessarily in the immediately preceding term. Transfers from two-year institutions have not necessarily completed a two-year degree. Returning students are included in the four-year transfer category.

- Graduate applicants and applicants entering from high school were concentrated in the fall term. Graduate applicants dominate the fall waiting line.

- The total count of transfer applicants not subsequently served, including returning student applicants, shows much less of a fall concentration, ranging from 466 for fall term and declining to 111 for spring term.

Figure 6-1
1992-93 Academic Year Waiting Line After Follow-Up
By Term and by Application Type



As a group, the 1992-93 unserved applicants generally had grade point averages and/or admissions index scores toward the lower end of the admissible ranges. Table 6-4 shows college GPA, high school GPA or admissions index, as appropriate, for the 1,116 unserved applicants for 1992-93 not classified as graduate or other post baccalaureate applicants.

Table 6-4
Grade Point Averages (GPA) and Admissions Indices (AI)
for 1992-93 Academic Year Waiting Line After Follow-Up,
Undergraduate Applicants

Admissions Index	Applicants	High School GPA	Applicants	College GPA	Applicants	GPA and AI not reported
76+	3	3.50-4.00	0	3.50-4.00	54	241
51-75	22	3.00-3.49	5	3.00-3.49	202	
28-50	143	2.50-2.99	4	2.50-2.99	260	
13-27	26			2.00-2.49	156	

Unserved Applicants by Institution, 1992-93

Figure 6-2 and Table 6-5 show the breakout of the 2,271 unserved applicants for 1992-93 by institution and by application type. "Multiple" indicates that the applicants were denied admission by more than one institution.

Figure 6-2
1992-93 Academic Year Waiting Line After Follow-Up
By Institution and By Application Type
Total = 2,271

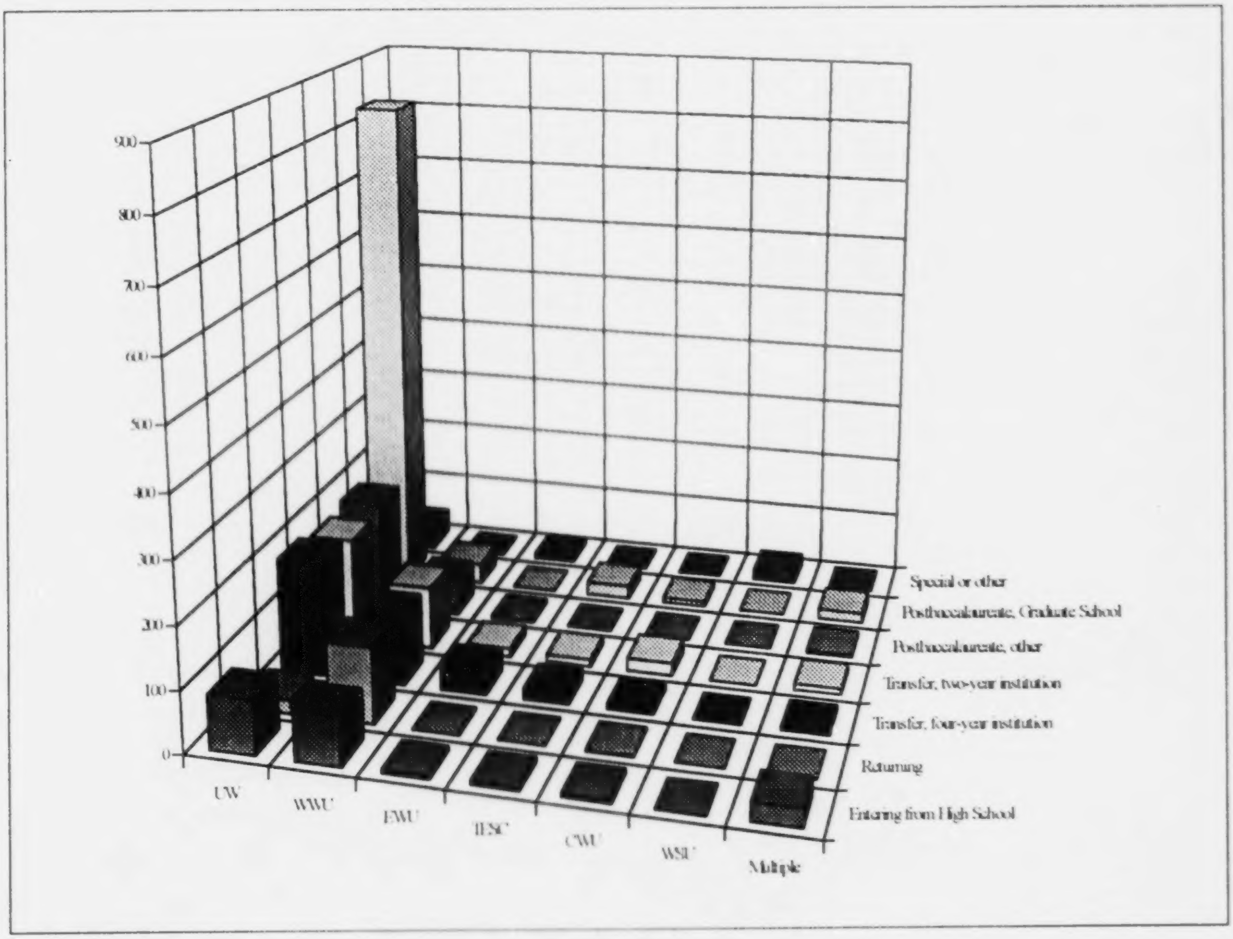


Table 6-5
1992-93 Academic Year Waiting Line After Follow-Up
By Institution and By Application Type

	UW	WWU	TESC	CWU	WSU	EWU	Multiple	Total
Graduate	830	35	22	8	0	0	16	911
Other Post Baccalaureate	181	58	0	0	0	3	4	244
Two-Year Transfer	171	103	11	21	0	14	10	229
Four-Year Transfer	186	111	17	8	0	33	5	251
Returning	22	123	0	2	0	0	0	147
High School	87	79	6	6	0	6	30	214
Special or Unclassified	38	0	0	0	18	7	0	63
Total	1,515	509	56	45	18	63	65	2,271

- Post baccalaureate applicants, graduate and other, mainly to the University of Washington, account over 50 percent of the total unserved applicants for 1992-93.

- Transfer applicants and returning student applicants, mainly to the University of Washington and to Western Washington University, account for the next largest share, 37 percent, of the total 1992-93 waiting line and over 75 percent of the undergraduate waiting line.

Chapter 7

COUNTY PARTICIPATION RATES, FALL 1993/94

County participation rates help describe in describing the level of service provided by the public higher education system to each county in the state.

The county participation rate is the number of persons enrolled in a public college or university per 100 persons in each county, age 17 and older. (Note: Use of a single participation rate for persons age 17 and over, rather than single year of age participation rates, is valid for present point in time comparisons. Analysis involving projections, however, must use single year of age participation rates due to changes in the composition of the population over time.)

The two-year public institutions include 27 community and five technical colleges throughout the state.

The four-year public institutions include the University of Washington and branch campuses, Washington State University and branch campuses, Central Washington University and the education center in Yakima, Eastern Washington University, Western Washington University, and The Evergreen State College.

The county of an enrolled student is taken from the permanent address as entered on the original application form.

Enrollment by county is from the official state funded enrollment reported to the Office of Financial Management. The participation rates are based on the actual Fall 1993 enrollment for two-year colleges and the Fall 1994 enrollment for four-year schools. The enrollment for two-year colleges include Timber Worker Displacement and Workforce Training (WFT) programs.

The formula for the county participation rate calculation is as follows:

$$\frac{\textit{Fall Headcount Enrollment by County}}{\textit{Age 17+ Population by County}} \quad \text{X} \quad 100$$

Tables 7-1 to 7-8 show participation rates by county in descending order with an average Washington participation rate at the bottom for each category. Figures 7-1 to 7-3 show the location of public higher education institutions in each county with county participation rates. Counties that are shaded have a participation rate higher than the state average. In this chapter, the Lower Division includes students categorized as freshman, sophomore, and other (non-matriculated). The Upper Division includes students categorized as junior, senior, and unclassified 5 (Post-Baccalaureate). The Graduate & Professional Division includes students categorized as Graduate and Professional. The Upper Division and Beyond includes the Upper and Graduate & Professional Divisions.

Note: Use of a single participation rate for persons age 17 and over, rather than single year of age participation rates, is valid for present point in time comparisons. Analysis involving projections, however, must use single year of age participation rates due to changes in the composition of the population over time.

Chapter 8

STATE EDUCATION ATTAINMENT AND STATE PARTICIPATION RATES NATIONAL COMPARISON

State Education Attainment, 1990

See Table 8-1

The education attainment statistics are a product of a 1990 national survey done by the Bureau of the Census. It shows the percentage of population 25 years and over who earned a bachelors degree or higher by state. In Washington State, 23 percent of the population age 25 years and over has attained at least a four-year degree, placing Washington at the 76th percentile, or 12th, compared to all other states in the U.S. as of April 1990.

In spite of the low ranking of the Washington State four-year Enrollment participation rate (see below), the educational attainment of the Washington population is relatively high. This suggests that Washington State has been attracting an educated population from out-of-state to sustain its labor market needs.

State Participation Rates

See Tables 8-2 to 8-16

Participation rates for Washington and other states assist in the comparison of Washington higher education service levels with those of other states. The state participation rate is the number of persons enrolled in four-year private and two- and four-year public institutions per 100 population in each state, aged 17 years and older. Two-year private colleges are not included in the study due to the unreliability of available data. (Note: Use of a single participation rate for persons age 17 and over, rather than single year of age participation rates, [illegible] for present point in time comparisons. Analysis involving projections, however, must use single year of age participation rates due to changes in the composition of the population over time.)

State population data are from the U.S. Census population estimate. The Washington population estimate is from the Office of Financial Management, Forecasting Division. The U.S. Census Bureau and the Office of Financial Management estimates for Washington are extremely close and based on July 1 estimates. State Enrollment data by type of college and division of study are based on the National Center of Education Statistics (NCES) - Integrated Postsecondary Education Data System (IPEDS).

The formula applied in the calculation is:

$$\text{Participation Rate (Rate per 100)} = \frac{\text{IPED Fall Headcount}}{\text{Estimated Population Ages 17+}} \times 100$$

The IPEDS Enrollment figures for Washington State are not exactly the same as the Washington State Higher Education Enrollment Report (HEER) for four-year public institutions or the Management Information System (MIS) for the two-year public colleges. (Does not include Technical College.) Comparison of the HEER, MIS, and IPEDS Enrollment is included in Appendix B-12.

For all public and private institutions (excluding the two-year private schools), the Washington State participation rate was 7.02 in Fall 1992 compared to 7.38 for the U.S. average. The 7.02 rate placed Washington in the top 48 national percentile ranking, or 32nd out of 51 states. The state at the 70 percentile ranking had 8.20 percent participation rate (Table 8-2).

The community college participation rate ranked high in the national two-year college category during 1990-92. In 1992 the rate was 3.94 compared to a 2.83 United States average and placed Washington at the 92 percentile ranking, excluding Washington technical colleges.

The four-year public institution rate was 2.16 compared to the national rate of 3.06 and was at the 2 percentile ranking.

The four-year private institution participation rate was 0.92 compared to the U.S. average of 1.49.

Comparing 1992 and 1990 statistics, Washington's total higher education Enrollment participation rate decreased to 7.02 from 7.09. The national percentile ranking dropped from 48 in 1990 to 38 in 1992.

A summary of 1990, 1991, and 1992 comparisons and full state participation rate statistics for 1992 are presented in the Tables 8-2 to 8-16.

Note: The Tri-Cities University Center opened Fall 1958 and The Evergreen State College opened Fall 1971. WSU - Tri - Cities replaced Tri-Cities University Center starting 1989. UW - Evening Degree Program, Bothell/Woodinville, and Tacoma opened Fall 1990. WSU at Spokane and Vancouver began separate funding Fall 1989. CWU Yakima started separate reporting Fall 1990 and combined reporting with the main campus again in Fall 1993.

#Estimated; actual data inaccurate or not available.

***October headcount 12th grade public school enrollments from Superintendent of Public Instruction Report P105. These tabulations do not double count students attending vocational skill centers outside their home school district and will not match other published figures.**

****Special forecast of 12th grade enrollment using Report P105 data or forecast of private schools.**

Note: Data on private high school graduates estimated after 1969.

Chapter 1

INTRODUCTION

This Supplement to Higher Education Enrollment Statistics and Projections 1995-97 Biennium is published by the Forecasting Division of the Office of Financial Management (OFM).

The publication includes Washington public higher education enrollment highlights for the community and technical college system and each four-year institution. Enrollment data for two University of Washington (UW) branch campuses and one evening program, and three Washington State University (WSU) branch campuses are shown separately.

The Tri-Cities University Center became WSU - Tri-Cities in Fall 1989. The Intercollegiate Center for Nursing Education (ICNE) at Spokane remains a consortium involving WSU, Eastern Washington University (EWU), and Whitworth College. ICNE enrollment was included in each participating school. Starting Fall 1993, the EWU enrollment at ICNE - Spokane has been included in WSU main campus total.

All public higher education institutions participated in preparing a brief description of institutional enrollment highlights covering the following areas:

- University/College Characteristics,
- Access and Participation Rates,
- Service Level and Student Flow,
- Off-Campus Programs, and
- Special Goals and Objectives (optional).

In this publication, the summary of annual average and fall term headcount and full-time equivalents (FTE) for both two- and four-year institutions extend back to 1970. Beginning 1993, the five Washington technical college enrollments have been included with the community college system. The county participation rate data, that show student access by geographic origin, is based upon Fall 1993 for two-year and 1994 for four year enrollment statistics. The student flow data, that indicates where students come from by type of institution, begins in 1981. Other historical enrollment information, from Fall 1981 through Fall 1994, is shown for each four-year institution.

The last chapter includes various four-year institution current demographic, enrollment, and degree statistics. Data is organized to provide detail by individual school, main campus subtotal, branch campus subtotal, and all campus total.

The main sources of enrollment data are from:

- State Board for Community and Technical College (SBCTC) Management Information System (MIS),
- Higher Education Enrollment Reports (HEER) from each four-year public institution.

All figures are state-funded enrollments only and do not include self-sustaining, no-credit course, correspondent course, ROTC, faculty/staff/state employee enrolled under fee waiver programs, and other non-state-funded enrollments.

Chapter 2

COMMUNITY AND TECHNICAL COLLEGE SYSTEM ENROLLMENT HIGHLIGHTS

Introduction

Washington's Community and Technical College Act of 1991 provides for a state system of community and technical colleges separate from both the public secondary schools and four-year institutions. The act requires that the colleges "offer an open door to every citizen, regardless of his or her academic background or experience, at a cost normally within his or her economic means" (RCW 28B.50.020(1)).

Each college district is required to "offer thoroughly comprehensive educational, training and service programs to meet the needs of both the communities and students served by combining, with equal emphasis, high standards of excellence in academic transfer courses; realistic and practical courses in occupational education, both graded and ungraded; community services of an educational, cultural and recreational nature; and adult education" (RCW 28B.50.020(2)).

Access and Participation Rates

In Fall 1993 the system served 175,445 (for 108,373 FTEs) unduplicated headcount enrollments in the state funded courses. (See Table 1.) The figures include Technical Colleges. Prior to 1993, Technical College enrollments were excluded.

In the contract funded area, 85 percent of the growth in FTEs came from the significant expansion of the Running Start program. In 1993-94 academic year there were 40 to 200 FTE at each college in this program. A total of 5,452 high school students enrolled over the year.

The Timber program funded 500 FTE students, while the colleges actually served three times as many dislocated timber workers. In 1993-94, the colleges served 2,738 unemployed timber workers or their spouses.

The ESHB 1988 created a new program which began in fall of 1993. The Workforce Employment and Training Act required that colleges use new funds to increase the space available to dislocated and unemployed workers. Colleges enrolled 3,500 FTE students in this program the first year.

The population has been growing more rapidly in some parts of the state than others, creating stronger enrollment pressure in high growth areas. Eighty-one percent of the growth is occurring in eight counties-Clark, King, Kitsap, Pierce, Snohomish, Spokane, Thurston, and Yakima. In Fall 1993, residents from King, Pierce, and Snohomish counties accounted for 55 percent of all in-state enrollees. However, the counties that enrolled higher than 5 percent of county participation rates are Whatcom, Grays Harbor, Walla Walla, Lewis, Franklin, Columbia, Cowlitz, and Benton. (See Table 2 and Figure 1.)

Student Characteristics

The racial composition of the student population in Fall 1994 was more diverse than that of the state as a whole (21 percent students of color at community and technical colleges, approximately 15 percent in the state population). Students of color comprised 17 percent of those in academic and vocational courses and 54 percent in basic skills (ABE/ESL) courses. The student population was more female (57 percent of those reporting gender) than the state's adult female population, typical of community and technical colleges nationally. The median age of students was 27.4 down from 27.8 the year before.

Off-Campus Programs

The campuses and off-campus sites of the 32 community and technical colleges provide facilities for academic instruction, workforce training and developmental education. The system through off-campus programs target education and training opportunities for people that have limited access to college facilities. Broadening the scope of instructional programs available through off-campus classrooms is just one way colleges are improving educational access and availability.

Chapter 3 A

UNIVERSITY OF WASHINGTON - SEATTLE ENROLLMENT HIGHLIGHTS

Introduction

The University of Washington (UW) was founded in 1861. As the comprehensive research university for the state, the University preserves, develops, and disseminates knowledge in a broad range of subject areas. A review of the University's history shows that state funded enrollment has increased from 16,164 students enrolled in Fall 1954 to the current level of 32,768 students enrolled in Fall 1994. Table 3 shows annual average and fall headcount and FTE, 1970-71 through 1994-95.

Access and Participation Rates

Residents of three counties (King, Snohomish, and Pierce) account for almost 60 percent of all students attending the University in Fall 1994. At the time of initial application, 15,396 students were residents of King County, 2,160 were residents of Snohomish County, and 1,895 were residents of Pierce County. The University is located in King County. (See Table 4 and Figure 2.)

Service Levels and Student Flow

Female participation rates continue to increase. Women comprised 50 percent of the undergraduates, 49 percent of the graduates, and 44 percent of the professional students enrolled autumn quarter 1994. Post baccalaureate enrollment declined as a result of moving the teaching certificate program to the master's level.

Upper division enrollment continues to increase. Of 8,802 new students autumn 1994, 3,299 came from high schools, 1,686 from Washington community colleges, 1,345 from Washington four-year, and 2,472 from out-of-state institutions. (See Table 5.)

The University has the highest retention rate among the main campuses of four-year institutions. Of all students attending in Spring Quarter 1993, 77 percent returned the following fall. (See Table 5.)

Off-Campus Programs

Off-campus non-state funded credit programs are provided through University Extension and Televised Instruction in Engineering (TIE). University Extension served 1,393 headcount (491 FTE) students off campus in Fall 1994 at school districts, hospitals, and other off-campus locations. The TIE program served 210 headcount (60 FTEs) students in Fall 1994 at various off campus business locations. Only non-credit courses were offered at the Downtown Extension location.

In addition, UW also provides on-campus extension programs. the on-campus extension programs served 1,393 students (491 FTE) in Fall 1994.

Chapter 3 B

UNIVERSITY OF WASHINGTON - EVENING DEGREE PROGRAM ENROLLMENT HIGHLIGHTS

Introduction

The University of Washington - Evening Degree Program has been separately funded since Fall 1990. It provides bachelor's degrees in the social sciences, the humanities, anthropology, business administration, communications, sociology, mathematics, English, political science, history, psychology, and a master's degree in construction management.

The enrollment in Fall 1994 was 563 students or 414 FTEs. (See Table 6 for the program enrollment history.)

Access and Participation Rates

Eighty-five percent of the UW - Evening Degree Program headcount is from King County. The remaining are from Snohomish County (6 percent), from Kitsap County (3 percent), with the remainder from several Washington counties. (See Table 7 and Figure 3.)

Service Levels and Student Flow

Out of 150 new students enrolled Fall 1994, 89 transferred from community colleges, 31 transferred from Washington four-year institutions, and 30 transferred from out-of-state institutions. The remaining 47 are former students and from unknown sources.

The retention compares to the main campus, with 366 students or 77 percent continuing in Fall 1994 from the previous Spring term. (See Table 8.)

Chapter 4

UNIVERSITY OF WASHINGTON - BOTHELL/WOODINVILLE ENROLLMENT HIGHLIGHTS

Introduction

The University of Washington - Bothell/Woodinville was established in Fall 1990. It provides upper division undergraduate education leading to bachelor's degrees in liberal studies, nursing, business administration, and a bachelor and master's degree in education. Plans are to add other undergraduate and graduate programs in the future as funds are appropriated. Masters programs are under development in engineering, liberal studies, and an education certification program is planned to complement the master's of education.

Fall 1994 enrollment was 641 students for 412 FTEs. (See Table 9 for the campus enrollment history.)

Access and Participation Rates

King and Snohomish Counties are the main participants accounting for 95 percent of total enrollment. Three percent are from Skagit, Whatcom, and Island counties combined. The remaining 2 percent are from adjacent counties. (See Table 10 and Figure 4.)

Service Levels and Student Flow

Out of 186 new enrolled students Fall 1994, 122 are from Washington community colleges, 39 are from Washington four-year institutions, and 25 are from out-of-state institutions. The remaining 60 are former students and from unknown sources.

The retention rate is high at 73 percent. (See Table 11.)

Chapter 5

UNIVERSITY OF WASHINGTON - TACOMA ENROLLMENT HIGHLIGHTS

Introduction

The University of Washington - Tacoma was established in Fall 1990. It provides upper division undergraduate education in business, liberal studies, nursing, and undergraduate and graduate programs in education and elementary education certification. Plans are to add undergraduate and graduate programs in the future as funds are appropriated. Additional baccalaureate programs are planned in physician assistants and engineering. Masters programs are under development in engineering and liberal studies.

Fall 1994 enrollment was 777 students for 537 FTEs. (See Table 12 for the campus enrollment history.)

Access and Participation Rates

There are 476 students, or 61 percent of the total enrollment, from Pierce County. Sixteen percent are from King county, 12 percent from Kitsap, 7 percent from Thurston and the remaining 4 percent from nearby counties. (See Table 13 and Figure 5.)

Service Levels and Student Flow

Out of 303 new students autumn 1994, 188 transferred from two-year institutions, 77 are from four-year institutions, and 38 last attended out-of-state institutions. (See Table 14.)

Chapter 6

WASHINGTON STATE UNIVERSITY

Introduction

Washington State University (WSU) was founded in 1890. Throughout its history, WSU has been a comprehensive institution of higher learning encompassing the liberal arts, professional education, basic and applied research, and extended education and public service. The University is the state's land grant research university, offering graduate and undergraduate education in a broad range of subject areas.

In 1979 the Legislature authorized the establishment of WSU branch campuses in Spokane, Tri-Cities, and Vancouver. Academic programs were already in place at all three centers and the legislation formalized and elevated the status of those centers to branch campuses.

Today, WSU is a multi-campus institution with campuses in Pullman, Spokane, Tri-Cities, and SW Washington in Vancouver and centers in Spokane and Yakima (the Intercollegiate Center for Nursing Education). WSU also has Cooperative Extension offices in all 39 counties, four research centers, and 16 Small Business Development Centers statewide and is responsible for administration of the Washington Higher Education Telecommunications System (WHETS), which transmits courses to various locations within the state.

Chapter 6 A

WASHINGTON STATE UNIVERSITY - PULLMAN ENROLLMENT HIGHLIGHTS

Introduction

WSU - Pullman is one of the largest residential universities west of the Mississippi. About one-half of the students in Pullman live in university housing or fraternities and sororities. The academic structure includes seven colleges, a graduate school and the Intercollegiate Center for Nursing Education (ICNE).

The Fall 1994 enrollment for WSU-Pullman was 16,588 students for 17,096 FTEs. (See the university enrollment history in Table 15.)

Access and Participation Rates

The Pullman campus draws the majority of its enrollment from throughout the state. Four counties, King, Pierce, Spokane, and Whitman, account for 53 percent of all in-state students attending the Pullman campus. (See Table 16.)

Service Levels and Student Flow

WSU - Pullman has historically had the higher share of its students enter directly from high school and is, therefore, characterized by a young student body. For Fall 1994 semester, the average high school GPA of regularly admitted students was 3.37. The retention rate has been among the highest in the state, accounting for 73 percent of the previous Spring total enrollment. See Table 17 and Figure 6. The vast majority of WSU students are fully enrolled and there is a tendency by students to carry heavy academic loads.

Off-Campus Programs

Intercollegiate Center for Nursing Education (ICNE)

The ICNE, located in Spokane, was established in 1968 and is a consortium of eastern Washington institutions (WSU, Eastern Washington University, and Whitworth College). The Center provides nursing education to 380 students at both the undergraduate and graduate levels. More than one-half of the students are enrolled as WSU students. Approximately 15 percent of the WSU ICNE students are graduate students. The ICNE delivers programs to Vancouver, Tri-Cities, and Yakima through the use of WHETS and commuting faculty. Students attending the ICNE are drawn from all over eastern Washington with the majority coming from Spokane and Yakima Counties. Over 40 percent of ICNE students are full-time students and over 50 percent are at least 25 years of age.

Other Off-Campus Programs

WSU offers a number of credit and non-credit courses and programs to serve the needs of Washington residents. The Extended Degree Program, initiated in Fall 1992, is an upper-division degree-completion program leading to a B.A. in Social Sciences. Courses are delivered via a variety of distance learning technologies, including satellite, video tape, correspondence study, and electronic mail. Through this program time- and place-bound students may receive a WSU degree without residency at any campus. Other degree programs offered outside WSU's campuses include a B.A. in Hotel and Restaurant Administration, offered in Seattle, Washington, and Krems, Austria; a Master of Engineering Management offered in Seattle at the Boeing Company; and a Master of Arts in Chemistry offered throughout Washington through distance learning technologies. A Doctor of Pharmacy program, offered jointly by WSU and UW, will begin in summer 1996 through distance learning technologies. WSU also has a large correspondence study program, with over 3,000 students are enrolled. A number of off-campus non-program related credit courses are also offered throughout the state of Washington, the nation, and worldwide.

A variety of off-campus non-credit courses, conferences, and workshops are sponsored by WSU's Conference and Institutes, serving more than 32,000 individuals throughout the state and the nation.

Washington Higher Education Telecommunications System (WHETS)

WHETS was constructed in 1983-84 and offered its first courses in 1985. The interactive microwave system allows courses to be broadcast simultaneously to several campus sites. The system serves Pullman, three branch campuses, Seattle Central Community College, Wenatchee Valley College and the Boeing Corporation. It has grown from a total of 14 WSU courses delivered in 1985-86 to a projection of 39 courses delivered in 1994-95. Course enrollments have grown over the same period from 103 to 4,612.

The system allows the branch campuses to offer a much broader array of courses and programs than if they were dependent on resident faculty for course delivery. The augmentation of resident faculty courses varies by campus, but ranges from 20 percent to 40 percent of courses being delivered via WHETS.

Chapter 6 B

WASHINGTON STATE UNIVERSITY - SPOKANE
ENROLLMENT HIGHLIGHTS

Introduction

In Fall 1994, WSU-Spokane offered 18 academic programs to approximately 359 students in engineering, architecture, computer science, education, pharmacy, criminal justice, interior design, food science and human nutrition, speech and hearing sciences, health policy and administration, construction management, landscape architecture, educational administration and engineering management.

WSU continues to address the needs of the Spokane health community through masters degrees in Food Science and Human Nutrition, Health Policy and Administration, Speech and Hearing Sciences, a fifth-year program in Pharmacy, the Health Research and Education Center, the Office of Rural Health, the Washington Institute for Mental Illness Research Training and a doctorate in Pharmacy.

The Fall 1994 enrollment of WSU-Spokane was 359 students for 257 FTEs. (See Table 18.)

Access and Participation Rates

Thirty-three percent of the campus total in-state enrollment is from Spokane County. The transfer of fifth-year programs in architecture, pharmacy, landscape architecture and construction management also draw many students from Pullman to the Spokane campus. Of the remaining 67 percent, 24 percent are from Eastern Washington and 26 percent from Western Washington. In addition, there were 53 out-of-state students plus 8 international students. This mix reflects the specialized nature of many of the Spokane programs, which draw regionally rather than locally. (See Table 19 and Figure 7.)

Service Levels and Student Flow

Out of 359 students, 61 transferred from Washington four-year institutions and 10 from out-of-state institutions. The number of continuing students was 273 accounting for 86 percent of the previous Spring enrollment. (See Table 20.)

Approximately 49 percent of students attend WSU-Spokane on a full-time basis. The other 51 percent for the most part, represent older, part-time, placebound students completing graduate degrees while working full-time. Their average age is 29, slightly lower than the other campuses due to the higher percentage of traditional, full-time students. These students tend to be in fifth-year programs, completing their undergraduate degrees and certification, or in the Speech and Hearing Science program offered jointly with EWU.

Chapter 6 C

WASHINGTON STATE UNIVERSITY - TRI-CITIES ENROLLMENT HIGHLIGHTS

Introduction

WSU - Tri-Cities was created in July 1989. Legislation consolidated the activities of the Tri-Cities University Center, previously supported by five institutions (University of Washington, Central Washington University, Eastern Washington University, Oregon State University, and WSU). Since 1993, all degrees offered at WSU are from WSU. The campus has responsibility for upper-division and graduate education to students primarily from Benton, Franklin, and Walla Walla counties. during 1994-1995 ten baccalaureate and 15 masters degree programs are being offered to some 1,300 students. The majority of programs are in engineering and technical areas, reflecting the five-decade history of the campus and its partnerships with the Tri-Cities scientific community. Other program areas include business, education, humanities, social sciences, and nursing.

The programs with the largest enrollment are engineering (28%) and humanities and social sciences combined (24%), followed by education (17%) and business (17%). Most of the WSU Tri-Cities undergraduate students are community college and four-year institution transfers who are placebound, working students completing degrees. Graduate students constitute almost 40% of the student body.

The Fall 1994 enrollment was 1,281 students or 635 FTEs. (See Table 21.)

Access and Participation Rates

Approximately 92 percent of in-state students are drawn from the Tri-Cities service area counties of Benton, Franklin, and Walla Walla. Almost 3 percent of students are from neighboring Yakima County. In addition, there were 42 out-of-state students. (See Table 22 and Figure 8.)

Service Levels and Student Flow

Over 75 percent of WSU - Tri-Cities students attend are part-time. Many of these can be characterized as older placebound working adults. The number of younger students is increasing, however, as more students opt to live at home while attending college. The average age of WSU Tri-Cities students is still over 30.

Out of 1,281 total students attending WSU Tri-Cities fall semester, 209 transferred from Washington community colleges, 166 from Washington four-year institutions, and 42 from out-of-state institutions. Of 1,118 students attending the previous spring semester, 750 continued their enrollment, account for 67 percent retention rate. (See Table 23.)

Chapter 6 D

WASHINGTON STATE UNIVERSITY - VANCOUVER ENROLLMENT HIGHLIGHTS

Introduction

WSU - Vancouver became a branch campus in 1979 (separately funded since Fall 1989). As a center for educational programming by WSU and other institutions in Southwest Washington, it has existed since 1983. Original academic programming by WSU - Vancouver concentrated in the high technology disciplines. With the closure of Evergreen programs in 1988, WSU began offering undergraduate programs in general studies. The focus for growth at WSU - Vancouver will be in upper division programming and some specialized graduate offerings meeting specific area needs.

In 1993-94, over 700 students are being served by five undergraduate and five graduate degree programs. These programs include engineering management, social sciences, humanities, psychology, education, business, and nursing.

Programs proposed over the 1995-97 Biennium will concentrate in the social sciences, humanities, sciences, and education. One focus will be on issues relating to natural resource management providing support to the natural resource industry of the region. Another focus will be masters of Public Administration (pending approval) which prepares students for careers in public and non-profit sectors.

The Fall 1994 enrollment was 807 students for 565 FTEs. (See Table 24.)

Access and Participation Rates

Seventy-four percent of WSU - Vancouver in-state students are drawn from Clark County. In total, 88 percent of students are from the six-county Southwest Washington service area. Forty-four students are from out-of-state, mainly from Oregon. (See Table 25 and Figure 9.)

Service Levels and Student Flow

Students at WSU - Vancouver are overwhelmingly classified as part-time (82 percent). Only 28 percent are full-time students and are attending at the upper level.

The average age of Vancouver students is 33 years, again confirming the non-traditional nature of the student body which is older, employed full-time, and placebound by job and family.

Out of 807 students enrolled in Fall 1994, 175 transferred from Washington community colleges, 96 from Washington four-year institutions, and 64 from out-of-state. Sixty-two percent was the campus retention rate. (See Table 26.)

Chapter 7

CENTRAL WASHINGTON UNIVERSITY ENROLLMENT HIGHLIGHTS

Introduction

Founded in 1891 as a state normal school, Central Washington University (CWU) has evolved into a comprehensive, regional university that offers over 100 bachelor's and 16 master's degree programs. The university continues to have the largest teacher preparation program in the state, certifying 468 teachers in 1993-94. Other programs include Accounting, Industrial Engineering Technology, Flight Technology, Music, and Paramedics. The Douglas Honors College offers a general education curriculum for high achieving students.

Access and Participation Rates

Over the last ten years, enrollment has increased from 7,377 to 8,468 FTEs, with an increase of over 1,000 FTEs in just the last two years. (See Table 27.) Residents of west-side counties accounted for 59 percent of all in-state students attending CWU during fall quarter 1994. For fall, 2,478 students from King County, 893 from Pierce, and 720 from Snohomish applied for admission. Consistent with its regional mission, CWU also draws heavily in Central Washington and received 879 students from residents of Yakima county, 637 from Kittitas, and 231 from Chelan. Enrollment of Yakima Valley minority students has been steadily increasing over the past five years. (See Table 28 and Figure 10.)

Service Levels and Student Flow

For Fall quarter 1994, CWU enrolled 1,018 students directly from high school, 1,564 transferred from two and four-year institutions, and 296 were returning students from unknown sources. Retention from Spring quarter 1994 to Fall 1994 was 5,604 or 73 percent. (See Table 29.)

Off-Campus Programs

Central Washington University's Extended University Programs provide service at five off-campus locations: Lynnwood, Sea Tac (formerly South Seattle), Steilacoom, Yakima and Wenatchee. These centers offer bachelor's degree programs for placebound students who have completed associate's degrees, and they enrolled a total of 871 FTE for Fall quarter of 1994. Over 3,500 students have earned degrees through extended university programs since the first center was established in 1975. During the 1993-94 academic year, 392 students graduated from the off-campus centers.

Chapter 8

EASTERN WASHINGTON UNIVERSITY
ENROLLMENT HIGHLIGHTS

Introduction

Eastern Washington University was founded in 1882. Eastern provides liberal arts and professional undergraduate education and offers graduate education in academic and professional areas of demonstrable need. International education and other programs of emphasis continue to be integrated into the curriculum.

Eastern offers nearly 200 undergraduate programs and options and twenty-four graduate programs. The University is organized into four colleges: Business Administration; Education and Human Development; Letters, Arts, and Social Sciences; and Science, Mathematics, and Technology. Eastern also has a consortium relationship with the Intercollegiate Center for Nursing Education.

An average 8,000 students attend Eastern each quarter. Fall 1994 enrollment was 8,360 students or 7,964 FTEs. (See Table 30.)

Access and Participation Rates

Located in Cheney and Spokane, Eastern serves students from Eastern Washington as well as the entire state. Of Fall 1994 in-state students, 51 percent were from Spokane County (where the university located) and over 5 percent were from King county. (See Table 31 and Figure 11.) Over 5 percent of Eastern students are from out of state and 5.5 percent are from foreign nations.

Over 10 percent are students of color. Eastern is committed to a diversified university where all students, faculty, and staff recognize and appreciate the value of each individual's uniqueness, beliefs, and cultures.

Service Levels and Student Flow

Out of 8,360 Fall 1994 enrollment, 747 were directly from high schools, 1,577 were from two- and four-year institutions, and 491 were former returning students, and 5,545 were continuing students. (See Table 32.)

Off-Campus Programs

Eastern Washington University opened the downtown Spokane Center in 1983. The Spokane Center, which was extensively renovated in 1992, provides a convenient, professional setting for professional programs and working adults. The Center offers a variety of undergraduate and graduate courses; over 2,300 undergraduate and graduate students were enrolled in courses at the Spokane Center during Fall 1994.

Chapter 9

THE EVERGREEN STATE COLLEGE ENROLLMENT HIGHLIGHTS

Introduction

The Evergreen State College was founded in 1971. The College emphasizes an interdisciplinary approach to instruction. Goals of the College are to maintain quality of instruction, to increase diversity among students, faculty, and staff, and to continue to experiment with innovations in teaching designed to improve the quality of undergraduate liberal arts education.

A review of the College's history shows that enrollment has increased from 1,178 students when the school opened in Fall 1971 to 3,614 students enrolled in Fall 1994 (See Table 33).

Access and Participation Rates

Residents of four counties, King, Pierce, Thurston, and Kitsap account for 76 percent of all in-state students attending the College in Fall 1994. At the time of initial application, 604 students were residents of King County, 949 were residents of Thurston County, 341 were residents of Pierce County, and 123 were residents of Kitsap County. The College is located in Thurston County. (See Table 34 and Figure 12.)

Service Levels and Student Flow

Out of 3,614 Fall 1994 enrollment, 475 were directly from high schools, 922 were from two- and four-year institutions, 348 were former returning students, and 1,869 were continuing students. (See Table 35.)

Fifty-one percent of the College's enrollment is aged 23 or older. Twenty-four percent of the Fall 1994 student body was 30 or older. During the 1993-95 biennium, a new set of weekend/evening offerings was added to the curriculum focusing on older, local-area students returning to college. As a result, the proportion of students aged 23 and older at the College has risen from 46 percent (1,569 students) in 1992 to 51 percent (1,856 students) in 1994.

Off-Campus Programs

The Evergreen State College maintains one off-campus undergraduate degree program, the Tacoma Program (opened in 1982). The Tacoma program is focused on providing instruction to urban minorities and currently enrolls 114 students.

Chapter 10

WESTERN WASHINGTON UNIVERSITY ENROLLMENT HIGHLIGHTS

Introduction

Western Washington University was founded in 1893. As a regional university, Western offers undergraduate and graduate degree programs directed primarily to the educational and professional needs of the residents of Western Washington. Study is organized into a Graduate School, the College of Arts and Sciences, the College of Business and Economics, the College of Fine and Performing Arts, Fairhaven College, Huxley College of Environmental Studies, and Woodring College of Education.

The University's student body increased from 1,600 students in 1954 to 10,616 students in 1980, and with limits placed on enrollment, has remained under that level since then. Fall 1994 enrollment was 10,598 students on 9,981 FTEs. (See Table 36.)

Access

Residents of four counties, King, Pierce, Snohomish and Whatcom, account for 68 percent of all in-state students attending the University in Fall 1994. At the time of initial application, 3,340 students were King County residents, 950 were residents of Pierce County, 1,059 were residents of Snohomish County, and 1,333 were residents of Whatcom County. The University is located in Whatcom County, but consistently enrolls students statewide. (See Table 37 and Figure 13.)

Service Levels and Student Flow

Due to the University's large number of freshman entrances, and lack of doctoral programs, the highest percent of its student body is 17 to 22 years of age.

Out of 10,598 Fall 1994 enrollment, 1,512 were directly from high school, 1,374 were from two- and four-year institutions, and 498 were former returning students with one student from unknown category and 7,214 were continuing students. Data on student flow during Fall 1981-1994 is shown in Table 38.

Off-Campus Programs

Western Washington University offers several off-campus programs. These programs are offered on a self-sustaining basis and they enrolled 700 students working toward a degree or certificate during Fall 1994, through the Center for Regional Services (CRS) in Woodring College of Education, and through the University Extended Programs (UEP).

CRS programs are offered in Human Services, Teacher Education, Educational Administration, and Adult Education at five different sites in northwest Washington. Some sites offer more than one program. Enrollment by site is: Bremerton, 49 students; Bellingham, 82; Everett, 215; Oak Harbor, 67; Port Angeles, 13; and Seattle, 256.

UEP enrolled approximately 100 students in Electronics Engineering Technology, Environmental Studies, Vehicle Research, and Speech Pathology/Audiology in Bellingham, Port Angeles, and Seattle.

Chapter 11

HIGHER EDUCATION COORDINATING BOARD-UPPER DIVISION EDUCATION PROGRAM SERVING TIMBER IMPACTED COMMUNITIES

Introduction

The Higher Education Coordinating Board (HECB) Upper Division Education Program Serving Timber Impacted Communities has been funded since fall 1992. It was designed to provide opportunities for residents of impacted timber communities to complete a bachelor's degree. The HECB has contracted thus far with Washington State University (WSU) to offer a site-based criminal justice program in Port Angeles and a telecommunications (courses delivered by videotape with asynchronous interactive strategies) social sciences program in all timber impacted communities. To date the HECB has also contracted with Western Washington University to offer site-based human services and environmental science programs in Port Angeles. Programs currently under contract are WSU's social sciences program, delivered in all timber impacted communities, and WWU's environmental science program, delivered in Port Angeles. Table 39 show 157 students for 62 FTEs combined for WSU and WSU programs in Fall 1994.

Access and Participation Rates

The largest number of WSU enrollees reside in Clallam county, followed by residents of Stevens, Lewis, and Grays Harbor counties. The largest number of WWU enrollees reside in Clallam county, followed by residents of neighboring counties. (See Table 40 and Figure 14.)

Service Levels and Student Flow

Admission to the programs normally requires prior completion of an associate degree or general education breadth and depth course work. Given this, most students are community college transfer students. The programs' retention rates compare quite favorably with main and branch campus enrollments.

Student Characteristics

Most program participants are place- and time-bound adults in their late 30s or early 40s. Many are unemployed or underemployed and expect the attainment of a bachelor's degree will advance their quality of life and career opportunities.

Off-Campus Programs

WSU	(September 1992-1993) BA in Criminal Justice in Clallam county BA in Social Sciences in five timber impacted counties
WSU	(September 1993-August 1994) BA in Social Sciences in twelve timber impacted counties
WSU	(September 1994-June 1995) BA in Social Sciences in all timber impacted counties
WWU	(January 1993-June 1993) BA in Human Services in Clallam county BA in Environmental Science in Clallam county
WWU	(July 1994-June 1995) BA in Environmental Science in Clallam county

Chapter 12

DEMOGRAPHIC, ENROLLMENT, AND DEGREE CHARACTERISTICS OF STUDENTS IN PUBLIC FOUR-YEAR INSTITUTIONS

This chapter is a collection of enrolled student statistics for all public four-year institutions. It provides the most recent fall term data by students' demographic, enrollment, and degree characteristics. The objective is to describe Washington State public four-year institution students from a statewide perspective, as well as by individual college/universities and branch campuses. Data are separately displayed for each branch campus and main campus wherever appropriate.

Demographic Characteristics

Tables 41 through 51 show students by gender and average age, resident/non-resident, Race and Hispanic Origin, and physical disability. Selected percentage calculations are given. The information on residency also groups students by class levels, i.e., lower class, upper class, and graduate and professional. Race and ethnic data for the higher education system is presented in two versions.

Version 1. Tables 44-46, provides data by "race category" (Part A) and Hispanic Origin (Part B), in separate tables, each summing to the universe of higher education enrollments. In Part A, persons who identify themselves as Hispanic are placed in the race category in which they identify themselves.

Version 2. Tables 47-57, combines race categories and Hispanic origin in one table. In this version, persons who identify themselves as Hispanic are shown in the Hispanic origin category, but are not included in the race categories.

Students with self-reported disability and students using disabled student services are categorized by type of disability, e.g., auditory, mobility, visual, or other impairments.

Enrollment Characteristics

Tables 52 through 57 provide information on students by credit hours enrolled, retention rates, and declared major area of study. For credit hours enrolled, data include part time and full time students by class levels. For retention rates, the table shows percentages as well as number of students who enrolled the previous spring term and who continue their enrollment in the subsequent fall term for each student classification. For major area of study, declared major students are summarized into the Classification of Instruction Program (CIP) which is the category used by the National Center for Education Statistics (NECS). Note that there are a large number of undeclared/pre-major students, especially in lower classes.

Degree Characteristics

Tables 58 and 59 contain history of degree completion since 1980-81 by level. Four-year public and private institutions and community college completions are included in Table 55. Percentages of degree awarded to total fall term enrollment for public four-year institutions since 1980-81 are provided in Table 56.

[1] Total Spring term enrollment.
[2] The spring term enrollees who continued enrollments in the following fall term.
[3] Includes the Seattle Center for Hotel and Restaurant Administration program.
[4] For WSU-Spokane, the greater number of fall term retained students from the previous spring term was due to relocating activities of continuing students within the school system. For other schools, it causes by changes of class standing after the previous term enrollment.
[5] Includes UW-Seattle, UW-Evening, WSU-Pullman (+SCHRA), CWU (+Yakima), EWU (+Spokane), TESC (+Tacoma), and WWU.
[6] Includes UW-Bothell, UW-Tacoma, WSU-Spokane, WSU-Tri-Cities, and WSU-Vancouver.

[1] Total Spring term enrollment.

[2] The spring term enrollees who continued enrollments in the following fall term.

[3] For WSU-Spokane, the greater number of fall term retained students from the previous spring term was due to relocating activities of continuing students within the school system. For other schools, it causes by changes of class standing after the previous term enrollment.

[4] Includes UW-Seattle, UW-Evening, WSU-Pullman, CWU (+Yakima), EWU (+Spokane), TESC (+Tacoma), and WWU.

[5] Includes UW-Bothell, UW-Tacoma, WSU-Spokane, WSU-Tri-Cities, and WSU-Vancouver.
